

These instructions describe how to replace gas and particle filters in the powered filter unit PFU 210e. Always use a particle filter with the gas filter. Replace the gas filter as soon as you smell contaminants in the air. Replace the particle filter when the filter status icon flashes red.

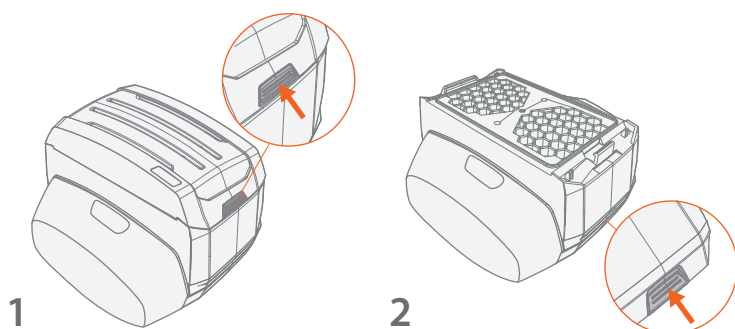

Inserting gas filter

1. Insert the gas filter into the blower unit's slot by pushing it first to the slot on the hinged side.
2. To lock the gas filter in place, push the gas filter's opening button side firmly.
3. To make sure that the gas filter is locked in place, pull the gas filter outwards.

Replacing gas filter

1. Remove the filter cover by pressing the filter cover opening button.
2. Remove the gas filter by pressing the opening button on the gas filter.
3. Insert a new gas filter as described in section "Inserting gas filter".

Inserting prefilter and particle filter

1. Insert the prefilter to the filter cover.
2. Insert the particle filter to the filter cover.
3. Attach the filter cover onto the gas filter by pushing it first to the slot on the hinged side.
4. To lock the filter cover in place, push the filter cover's opening button side.

**Replacing particle filter**

1. Remove the filter cover by pressing the filter cover opening button.
2. Remove the particle filter and the prefilter from the filter cover.
3. Insert new filters as described in section "Inserting prefilter and particle filter".
